

April-May Newsletter

Club members who attended the International Classic Motorcycle Weekend last March, are probably aware that the Italian guests who visited us came from at least 3 clubs. So it goes almost without saying that we were invited to attend the various rallies and/or other events that they organize from time to time.

So, for the first time ever in the history of an HMC newsletter, we are reproducing information about these events for your consideration should they interest you. Please note that since these are not HMC events, the committee expresses no particular preferences and does not endorse or otherwise any of them.

29th – 30th May

Sixth raduno organised by the motorcycle section of the *Veteran Car Club Iblea*. This starts in Ragusa and includes visits to Ragusa Ibla, Giarratana, Palazzolo, Mineo, Caltagirone and Chiaramonte. For further details go to: <http://www.vccibleo.it/moto.php>

8th – 11th June

Raduno organized by *Club La Manovella Acireale*. Places visited include Palermo-Trapani-Mazara with lots of sightseeing stops. According to organisers some parts of the route are fairly long and include autostrade. Therefore, those considering participating should use an appropriate machine.

12th – 13th June

Sixteenth raduno "*Nando Pennisi*" organized by the same club for pre-1958 motorcycles. This will be held in the Palermo region. For further details go to: <http://www.lamanovellaacireale.it/>

25th, 26th & 27th June

The first raduno organized by the new **NBB (Nothing But British)** club in Torino. British bikes up to the end of the 70's can take part. For further details please phone Alberto Bonzi on (0039) 011 6612257 or email 0116612257@iol.it

If you decide to participate in any of the above, you can rest assured that the organizers will give you a warm welcome.

In the meantime and a bit closer to home, we will also be organizing some events for the spring and summer season such as rides, meals and even a BBQ or two. So please come along and enjoy yourselves. Further details later
